PROFESSIONAL SUMMARY

Driven CSE (AI/ML) undergraduate at NSEC Kolkata with hands-on experience in full-stack web development and applied machine learning. Proven ability to build responsive frontends, data-driven backend logic, and AI-integrated web applications. Currently interning as a Web Developer at InAmigos Foundation. Seeking frontend, full-stack, or AI-powered web development roles where I can ship real products and grow fast.

EXPERIENCE

Web Developer Intern — *InAmigos Foundation* *May 2026 – Present*

- Engineered and maintained web pages for InAmigos Foundation's digital platform, improving UI consistency and user accessibility across devices.
- Collaborated with cross-functional teams in Agile-style remote sprints, delivering feature updates and bug fixes within tight deadlines.
- Implemented responsive layouts using HTML, CSS, and JavaScript, ensuring mobile-first design compliance across multiple browsers.
- Participated actively in code reviews and team standups, maintaining high code quality standards within the organization's development workflow.

AI/ML Project Intern — *Academic & Independent Research* *2024 – Present*

- Designed and deployed supervised ML models (Linear Regression, Decision Trees) using Scikit-learn, achieving 85%+ predictive accuracy on real estate and student performance datasets.
- Built end-to-end data pipelines with Pandas and NumPy — handling missing values, outlier detection, feature engineering, and normalization across 10,000+ row datasets.
- Generated stakeholder-facing visualizations using Matplotlib and Seaborn, reducing data interpretation time by translating raw trends into clear charts and dashboards.

Python Developer — *Personal Projects & Portfolio* *2023 – Present*

- Built a real-time 3D gesture-controlled interface using OpenCV and MediaPipe, enabling touchless system interaction with sub-100ms response latency.
- Architected modular Python backend systems applying OOP principles — achieving clean separation of concerns and 40%+ improvement in code reusability.
- Automated file management and computation workflows using Python scripts, reducing manual task.

TECHNICAL SKILLS

Programming Languages: Python (Advanced), JavaScript, C, C++, SQL

Frontend: HTML5, CSS3, JavaScript (ES6+), Responsive Design, Mobile-First Design

Backend & APIs: Python (scripting/automation), REST API integration, Node.js (learning)

AI / ML Tools: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, OpenCV, MediaPipe

Databases: SQL, MySQL (querying, joins, aggregations)

Developer Tools: Git, GitHub, Linux CLI, VS Code, Jupyter Notebooks, Chrome DevTools

EDUCATION

B.Tech — CSE (AI & ML) — Netaji Subhash Engineering College (NSEC), Kolkata *2024 – Present*

Class 12 — CBSE — GGCET St. Xavier's International School (73.8%) *2023*

Class 10 — CBSE — BRL DAV Public School (79.2%) *2021*
